

How to use this board-deck template

Your final board presentation — ~13 content slides, ~20 minutes plus 5 minutes of Q&A (December 11, 20% of your grade).

- Each slide's **Fed by** card names the lessons and labs that produce its content; the **Memo §** tag shows which board-memo section it shares its argument with. Deck and memo are one argument.
- These slides say WHAT to cover, not HOW to show it — that is your call. A strong board deck is mostly diagrams, charts, and one clear number per slide, not walls of bullets.
- Where a visual would land harder, look for the **◆ Visual idea** prompt — a starting point, not a rule. The grey prompt bullets are the points to make; replace them with your own content in whatever form argues best.
- Aim for ~60–90 seconds per slide. Build S2 (executive summary) last.
- Speaker notes on each slide carry fuller guidance and an illustrative example.

Executive Board Presentation

Executive summary / the ask

What the company has, what it needs, the three-phase path, the investment ask.

WRITE LAST

- What the company has today (backbone in one line)
- What it needs — the value at stake
- The three-phase path: Stabilise → Automate → Orchestrate
- The investment ask + headline cash outcome

◆ **VISUAL IDEA** *One big number — the value at stake, or the size of the ask — or a simple Stabilise → Automate → Orchestrate arrow. Not four bullets.*

BACKS MEMO

§1

PHASE

Frame

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

Context & backbone

Current integration stack, archetype, and primary thread.

- Current integration stack
- Operating-model archetype
- Primary thread (Customer / Operations & Supply Chain / Cash Management)

◆ **VISUAL IDEA** *A simple systems diagram of the current stack (boxes + arrows) shows the backbone faster than any list.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

FED BY
W1

BACKS MEMO
§2

PHASE
Diagnose

The strategic problem

Where the backbone fails to leverage — the value at stake.

- Where the backbone fails to leverage
- The business consequence
- The value at stake (quantify if you can)

◆ **VISUAL IDEA** *Mark the value leak on a small process strip, or show one chart that sizes the gap.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

FED BY
W2

BACKS MEMO
§2

PHASE
Diagnose

Backbone diagnosis

Process map; control + decision points; friction chain; the board-level consequence.

\$44

in modeled exposure

6 of 30 synthetic orders • 20% rework rate • 18.7 min average lateness

Live vs. nightly-cached availability data disagree at the kitchen feasibility check (②), the exact seam where digital ordering meets kitchen execution.

Lab 1

BACKS MEMO
§3

PHASE
Diagnose

Automation opportunity

The best RPA candidates — where automation adds value.

- Top RPA candidates (from your Week 4 scan)
- Why each qualifies — repetitive, rules-based, high-volume
- Where automation adds the most value

◆ **VISUAL IDEA** A 2×2 (volume × rule-stability) or a ranked bar makes your RPA priorities obvious at a glance.

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

W4 · Lab 2

BACKS MEMO

§4

PHASE

Diagnose

Automation journey

Working automation + CoE / operating model + a simple ROI.

- Your Lab 2 working automation (what it connects)
- Where it broke + the oversight you added
- Your CoE / operating model (Week 5)
- A simple ROI estimate

◆ **VISUAL IDEA** *A before/after workflow, or a small ROI bar (hours or \$ saved) — show the change, don't just claim it.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

BACKS MEMO

\$4

PHASE

Diagnose

Agent design

SPAR architecture, tools, and the step that needs AI judgment.

- The one step needing AI judgment (why rules fail)
- SPAR architecture: goal, tools, where Reflect sits
- The tool set

◆ **VISUAL IDEA** *Draw the SPAR loop (goal → plan → act → reflect). Architecture is far clearer drawn than described.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

W7–W8 · Lab 3

BACKS MEMO

§5

PHASE

Design

Agent governance

Human-in-the-loop boundary, adversarial failure mode, and guardrails.

- Human-in-the-loop boundary
- Most consequential adversarial failure (from Lab 3)
- The three guardrails before go-live

◆ **VISUAL IDEA** *A small table of your three adversarial tests (input → result → guardrail), or a human-in-the-loop decision flow.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

FED BY

W9–W10 · Lab 3

BACKS MEMO

\$5

PHASE

Design

Three-phase roadmap

Stabilise → Automate → Orchestrate over the horizon you set.

- Phase 1 — Stabilise
- Phase 2 — Automate
- Phase 3 — Orchestrate
- Your timeframe for each phase — and why it fits your company

◆ **VISUAL IDEA** *A phased timeline / roadmap band over the horizon you choose — the single most expected visual on a board deck.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

FED BY

W11 · Lab 4

BACKS MEMO

§6

PHASE

Implement

Value / cost / risk

Per phase: investment estimate, key risks, and success metrics.

Phase	Timeframe	Investment (est.)	Key risks	Success metric
Stabilise	[]	[]	[]	[]
Automate	[]	[]	[]	[]
Orchestrate	[]	[]	[]	[]

◆ **VISUAL IDEA** Keep the table, or turn it into a phased value-vs-investment chart if that argues harder.

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

FED BY
W11 · Lab 4

BACKS MEMO
§6

PHASE
Implement

Human-AI partnership

Workforce transition, reskilling, ethics, and the governance model.

- Roles that change / roles created
- Reskilling approach
- Governance model + ethical commitments

◆ **VISUAL IDEA** *A before/after of roles, or a simple reskilling flow — people changes read better as a picture.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.

FED BY
W13

BACKS MEMO
§7

PHASE
Implement

The ask / close

The investment decision requested of the board.

- The specific decision requested
- The investment figure
- The one thing you want the board to remember

◆ **VISUAL IDEA** *End on one image or one number — the single thing you want the board to remember. Never bullets.*

These are the points to make — show them however lands best: a diagram, chart, image, or a few words. Be creative.
